

**Columbia Scientific,**<sup>LLC</sup>  
Expanding the Possibilities of Neurorehabilitation

## **Are you including Respiratory Muscle Training in YOUR practice?**

THE BREATHER® is the first drug-free, evidence-based Inspiratory & Expiratory Respiratory Muscle Training (RMT) device to address respiratory muscle weakness using resistance through the whole work cycle. This low-cost device can be used by COPD, Dysphagia, CHF, and Neuromuscular disease patients, as well as children aged 4+ and adults interested in healthy aging. Decrease length of stay, reduce hospital readmission rates, improve range of food intake, increase maximum phonation time and improve completion of ADLs. Order some today!

### **MEDICAL RESULTS**

- ⇒ Improve Oxygen Saturation
- ⇒ Reduce Breathlessness
- ⇒ Improve Peak Cough Flow
- ⇒ Reduce Hypertension
- ⇒ Speech & Swallowing Performance
- ⇒ Increase MIP and MEP

**Expand treatment options for your patients**

**Columbia Scientific now offers The Breather**
